

Introducing Orkestra™ Intrinsic[®] brand fungicide Let the performance begin

For fast and long-acting disease control, add **Orkestra Intrinsic** brand fungicide to your nursery disease-resistance management program. Two modes of action perform in unison for protection against top-of-mind diseases such as leaf spots, powdery mildews, rusts and anthracnose. **Orkestra Intrinsic** brand fungicide, used during mid-production, provides effective disease control and plant health benefits, including stronger roots and improved plant resilience to stress.

Featuring a new BASF active ingredient, **Orkestra Intrinsic** brand fungicide provides highly effective control of foliar and soilborne diseases. Rely on **Orkestra Intrinsic** brand fungicide for healthier, more consistent, high quality plants in your nursery.

- Effective disease control: Controls a broad spectrum of key diseases; formulated with translaminar stability to stay where diseases occur and also systemic acropetal movement
- Dual modes of action: Features two modes of action for greater efficacy and resistance management
- Plant health benefits: Delivers plant health benefits to help speed recovery from stressors like cold, heat, drought, and shipping

Effective disease control

- Orkestra[™] Intrinsic[®] brand fungicide provides preventive, early curative, and residual control of key ornamental diseases, quickly stopping the growth of fungal cells
- Controls a broad spectrum of key diseases such as powdery mildews on crape myrtles and roses, and *Myrothecium* leaf spot on foliage and woody ornamental plants

Control of Japanese Ligustrum Cercospora (Cercospora spp.)

A. Palmateer, University of Florida, 2014. BASF-sponsored trial.¹

Control of Fusarium Aerial Blight *(Fusarium* spp.) of Hosta 'Areomarginata'

Orkestra Intrinsic brand fungicide @ 10 fl. oz. Pageant Intrinsic brand fungicide @ 16 oz.

J. Buck, University of Georgia, 2014. BASF-sponsored trial.²

Orkestra Intrinsic controls the following foliar, crown, and

soilborne diseases:

- Anthracnose
- Downy mildews
- Leaf spots
- Rusts
- Soilborne diseases
- Crown and basal rots
- Flower and petal blight
- Powdery mildews
- Scab
- Stem or twig blights and dieback

To learn more about **Orkestra Intrinsic** brand fungicide, visit betterplants.basf.us or contact your BASF representative.

- Foliar, stem, and crown diseases are controlled for up to 14 days under moderate infection
- Soilborne diseases such as Cylindrocladium, Fusarium and Pythium controlled with drench applications are managed on 7-28 day intervals, depending on disease pressure and environmental conditions

D. Norman, University of Florida, 2015. BASF-sponsored trial.³

- ¹ Orkestra Intrinsic brand fungicide and Pageant Intrinsic brand fungicide statistically similar and different from Untreated Inoculated.
- ² Partial data is shown. Orkestra Intrinsic brand fungicide is statistically different from Mural and Untreated Inoculated after two applications. Orkestra Intrinsic brand fungicide is statistically similar to Affirm; however, for Orkestra Intrinsic brand fungicide after 2nd application and for Affirm following 3rd application.
- ³ Applications 5/27 & 6/3 applied at rate 100 gal. An adjuvant needs to be used for best control of this disease.

Always read and follow label directions.
